the destruction of organic matter Habitat destruction is the process by which natural habitat becomes incapable of supporting its native species. In this process, the organisms that previously used the site are displaced or destroyed, reducing biodiversity. Habitat destruction by human activity is mainly for the purpose of harvesting natural resources for industrial production and urbanization.

the destruction of organic matter Anaerobic digestion is a collection of processes by which microorganisms break down biodegradable material in the absence of oxygen. The process is used for industrial or domestic purposes to manage waste or to produce fuels. Much of the fermentation used industrially to produce food and drink products, as well as home fermentation, uses anaerobic digestion.

the destruction of organic matter biogas . HANDBOOK . 7 . Foreword. One of the main environmental problems of today's society is the continuously increasing production of organic wastes.

#### **biogas**

the destruction of organic matter 3. Degradation reactions by activation type. Without activation, the persulfate anion will react with some organic chemicals, but degree of removal is less than that obtained using activated persulfate because of the lower oxidation potential of the persulfate anion ( $E^0 = 2.01 \text{ V}$ ) (Latimer, 1952, Oh et al., 2010, Le et al., 2011, Lee et al., 2012, Shih et al., 2012).
